Chapter 279: The Network of Divine Supervision

---

1. Sung Jin-Woo’s Strategic Vision

Understanding the vast scope of his power and influence, Sung Jin-Woo took proactive steps to further his dominion and efficiency:

Systems, Inner Worlds, and Clones:

The creations bestowed upon his subjects—systems, inner worlds, and clones—were not merely gifts but part of a grand strategy.

These creations were designed to increase his divine power as each new system, inner world, or clone expanded his reach across the multiverse.

Initiative and Leadership:

Sung Jin-Woo acted before Ashborn and Sung Su-Ho, recognizing the immense potential of these tools.

By taking the initiative, he solidified his position as the foremost authority among the Divine Triad.

---

2. The Divine Network Connection

To manage the countless troops, systems, and creations under his command, Sung Jin-Woo established a universal divine network:

Connection to the Creator:

All troops under the Divine Triad—including those of the Twelve Divine Beings—were now directly connected to Sung Jin-Woo’s divine consciousness.

Every thought, action, and decision made by these beings was instantly transmitted to him.

Streamlining Supervision:

This connection allowed Sung Jin-Woo to efficiently monitor and manage the vast multiverse without delay.

Issues, conflicts, and challenges were detected in real time, enabling immediate intervention.

Unity Through Thought:

The shared connection created a sense of unity among the troops, as they felt guided and protected by Sung Jin-Woo’s presence.

It also ensured that no rogue actions or betrayals could occur without his knowledge.

---

3. Boosting Divine Power Through Connection

The divine network amplified Sung Jin-Woo’s already immeasurable power:

Mutual Enhancement:

Each system, inner world, or clone creation contributed a fragment of energy back to Sung Jin-Woo, strengthening his divine essence.

The thoughts and faith of his subjects further fueled his omnipotence.

Infinite Growth:

With centillions of troops, each expanding their own inner worlds and systems, Sung Jin-Woo’s power grew exponentially.

His divine jewel processed and refined this energy, making him unstoppable.

---

4. Benefits to the Divine Triad and the Twelve Divine Beings

While Sung Jin-Woo’s connection was central, the network benefited Ashborn, Sung Su-Ho, and the Twelve Divine Beings as well:

Shared Oversight:

Although Sung Jin-Woo was the primary node, Ashborn and Sung Su-Ho also had access to the network’s information, allowing them to oversee their realms efficiently.

This collaboration ensured balance among the Triad.

Strengthened Alliances:

The Twelve Divine Beings, as extensions of the Triad’s will, became more synchronized with each other and their leaders.

Their troops operated with greater cohesion, enhancing the Triad’s overall military strength.

---

5. The Grand Supervision System

Sung Jin-Woo’s divine network functioned as an unparalleled system of governance:

Omniscience:

Through the network, Sung Jin-Woo could perceive every detail of his subjects’ actions across the multiverse.

No event, no matter how small, escaped his notice.

Omnipresence:

By projecting his thoughts through the network, Sung Jin-Woo could effectively be present in multiple places simultaneously.

This allowed him to address countless situations at once.

Omnipotence:

The energy flowing through the network continuously augmented his power, enabling him to perform divine acts with ease.

---

6. The Reaction of Ashborn and Sung Su-Ho

Ashborn and Sung Su-Ho, while recognizing Sung Jin-Woo’s unprecedented initiative, viewed this development with respect and admiration:

Ashborn’s Perspective:

As the God of Death and Balance, Ashborn saw the network as a necessary step to maintain order in the multiverse.

He acknowledged Sung Jin-Woo’s foresight and supported his efforts.

Sung Su-Ho’s Perspective:

Sung Su-Ho, as the God of Dragons and Justice, embraced the network as a means to protect their realms and subjects more effectively.

He admired his father’s leadership and ingenuity.

---

7. A New Era of Efficiency and Power

This monumental development marked the beginning of a new era for the Divine Triad and their subjects:

Absolute Supervision:

The network eliminated inefficiencies and ensured that all actions aligned with the Divine Triad’s vision.

Sung Jin-Woo’s presence became a guiding force for the multiverse.

Unparalleled Unity:

The seamless connection fostered cooperation and loyalty among the troops, strengthening the Divine Triad’s dominion.

Limitless Potential:

With every subject contributing to the network, Sung Jin-Woo’s power and influence continued to grow without bounds.

Conclusion

By creating this divine network, Sung Jin-Woo not only enhanced his power but also solidified his role as the ultimate overseer of the multiverse. His ability to connect with and guide his subjects ensured that the Divine Triad’s vision of harmony, efficiency, and infinite growth became a reality, ushering in an era of unprecedented prosperity and order.
